

## **Product Development Engineer**

Systemgroup is an award-winning Microsoft Gold Certified Partner, who attracts and hires the exceptional people who are able to interact with customers, quickly understand their business issues and translate that knowledge into high value business solutions.

We are actively seeking a Product Development Engineer to fulfill the growing demand in our Custom Development team.

### **Highlights of the job include:**

Responsibility for assisting in the architecture of enterprise-level business solutions  
Design and development using the Microsoft suite of tools  
Source control and configuration management  
Packaging and deployment  
Support for testing and QA activities  
Technical documentation and knowledge transfer

### **To be successful in this role, you should have experience with:**

- Drive the implementation and successful end user experience of Systemgroup products. Provide key direct support in resolution of product issues.
- Design and develop software enhancements for products in Mining and Healthcare.
- As a technical leader, drive project initiatives collaborating with the rest of the delivery team ensuring that product development milestones and deadlines are met.
- Evolve state-of-the-art techniques for developing and managing software to work within our development environment.
- Be a leader and contributor in developing an environment of continuous improvement across product lines and development groups.
- Analyze and provide feedback on peer designs in an open and collaborative design review forum.

### **Desirable factors for this role are:**

- Experience with one or more of the following industries: Mining, Healthcare, Finance, and Insurance.
- Experience driving technology integration and adoption
- Experience with Microsoft SharePoint 2007+

All Systemgroup employees enjoy a competitive package of above-market compensation, banked overtime, flexible work environment, and accelerated career development paths.
