

IT Consultant

Work Location: Mississauga

Job Description:

Systemgroup Consulting is team of business and technology professionals who are passionate about building unique cutting-edge solutions using the Microsoft product suite that help our customers realize their technology investments.

As a multi award winning Microsoft Gold Certified Partner, we attract and hire exceptional co-ops and new grads that are looking to jump-start or accelerate their career growth.

We will put you front and center on active projects with real clients, while giving you the support you need to turn knowledge into fantastic tangible results.

Skills:

- **Intermediate to Advanced understanding of .NET development**
- **SQL Server 2005/2008 development experience**
- **Practical experience with a variety of SDLC methodologies**
- **User Interface design/development (Silverlight, AJAX, JQuery, etc...)**
- **Strong client facing and presentation skills**

Systemgroup offers a competitive package of above-market compensation, banked overtime, flexible work environment, and accelerated career development paths.

Testimonials from Co-op students

"Systemgroup provides an experience in which you are an integral part of a team responsible for developing real solutions that matter to real clients."

- **Matt (current lead developer on multiple projects)**

"The quantity and quality of experience that I've gained at Systemgroup has far exceeded my expectations."

- **Riccardo (moved on after 3 years to become manager at Microsoft head office)**
